## FINCODA

### Student needs: Future and present

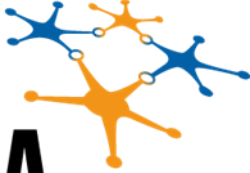

### FOUR CATEGORIES OF 21ST-CENTURY SKILLS

ATCS

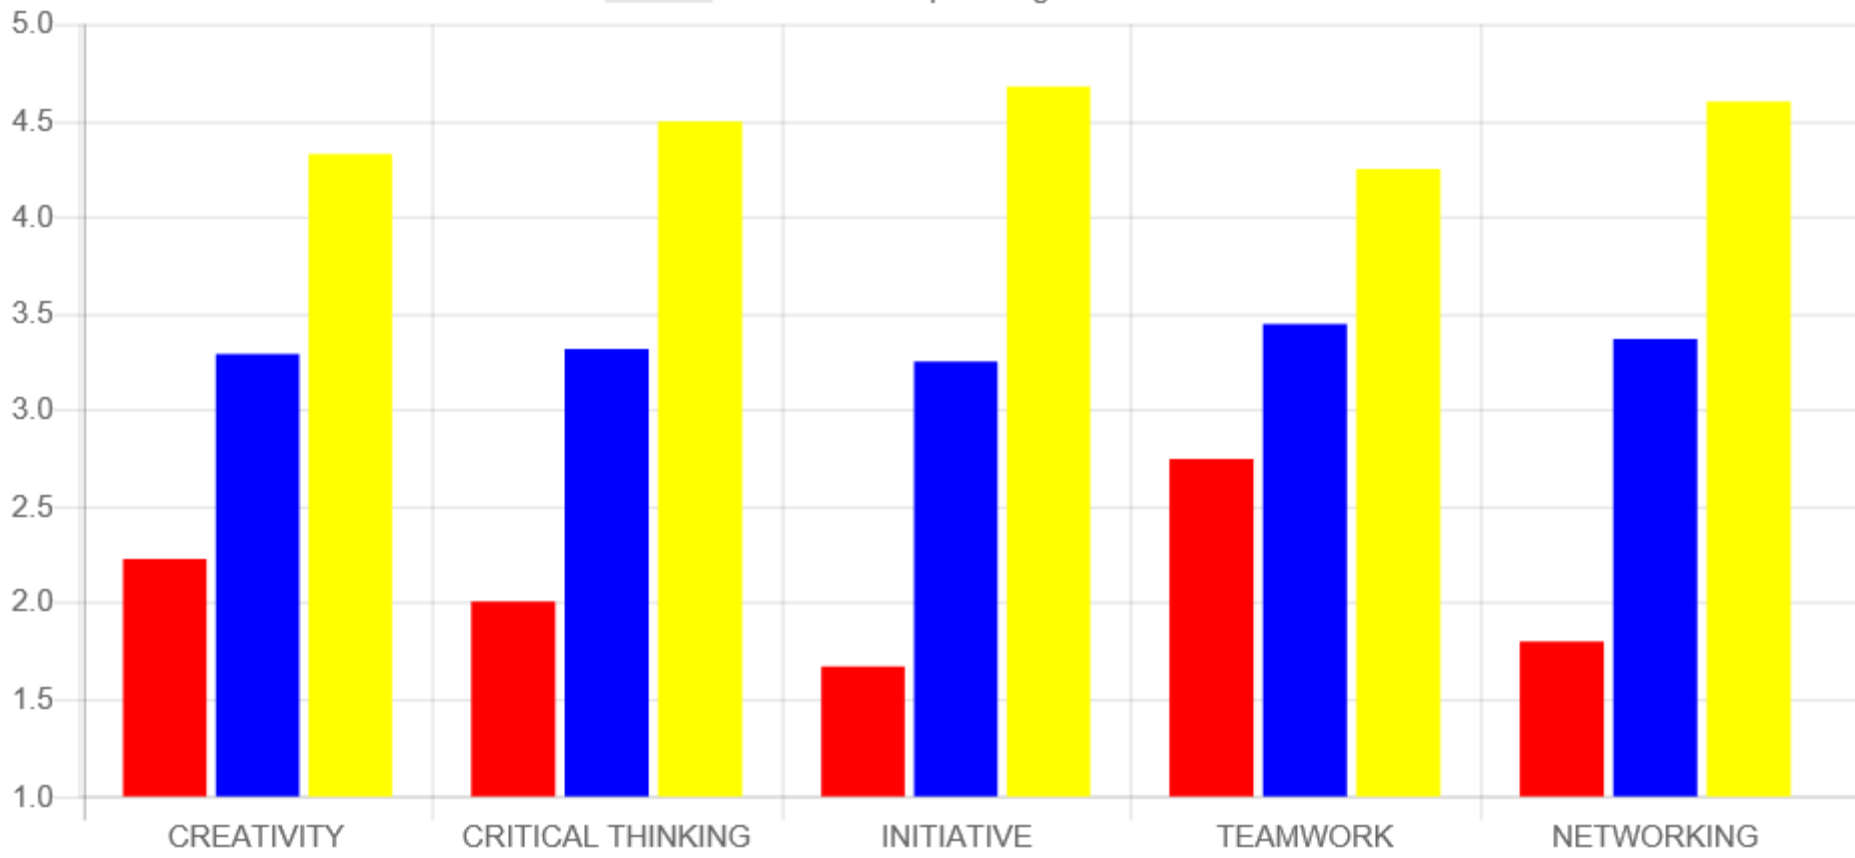

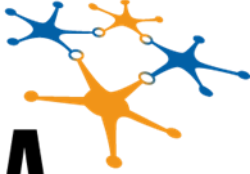

- **Present needs and future needs:**
  - **First category of 21th century skills:** Innovative skills. Fincoda barometer functioned as a baseline measurement. Necessary for the future: Fincoda barometer follow up. Evaluation outcome in our pilot workshop with the students:
    - *Need for follow-up to measure the improvement*
  - **Second category of 21th century skills:** Digital skills, necessary to work safely on the internet, create documents efficiently, search in a structured way. Decide which information is true and which (maybe) not
  - **Third category of 21th century skills:** Communication, collaboration. Combine the Fincoda barometer with workshops to become aware of your own skills and others. For example: students participating in ECDL's pilot session.

Dimension	Dimension Average
CREATIVITY	3.29
CRITICAL THINKING	3.32
INITIATIVE	3.25
TEAMWORK	3.44
NETWORKING	3.37

## Group average score per dimension

Minimum Group Average Each Dimension    Group Average Each Dimension    Maximum Group Average Each Dimension

- Which innovative competencies do you consider to be your strongest? Are those compatible with the results of the Fincoda Barometer?
- Being innovative, what are you doing when you are at your best?
- Which competencies would you like to develop? How would these help you?
- What do you admire in others when they are innovative? What is it they actually do? Would you like to try as well?
